Introduction to the catalog

Origins In 2001, Bonnie Fuller, Dovie Darchuk, Suzanne Shemwell, Linda VanZant, Barbara Wright, and Carolann Zagrafos— all members of the Boise Dead Relative Collectors— volunteered over 500 hours to create the first electronic, alphabetical index to more than 13,000 inmate records from the Idaho Penitentiary. In 2003, volunteer Julie Yandell expanded public access even further by using census records, and prison reports and registers to compile a list of territorial prison inmates.

In 2007, the Idaho State Historical Society’s Public Archives and Research Library leveraged this generous contribution to preserve the most fragile inmate files and photographs (those originating between 1864 and 1947) and to enhance public access even further. This project was funded by a grant from the National Historical Publications and Records Commission (an arm of the National Archives and Records Administration), and work began in September 2007.

Content The following catalog is a *sampling* of inmate files from the main collection, compiled by our volunteers and staff, with expanded and enhanced content. This catalog aims to provide access by register number, name, alias, crime, county or jurisdiction, age, year of birth, and year of incarceration.

The scope of the main catalog aims to cover *all* inmates of the territorial and state penitentiaries between 1864 and 1947, including those for whom individual case files may not survive and who can only be identified by cross-referencing other archives holdings. Inmates who are identified in this way are indicated in the catalog as “collection references,” with the citations included in the “notes” field. Inmates for whom the archives holds individuals records are assigned individual file reference numbers, as follows:
