MONROE AND HORNET CREEK

Number 1085

September 1996

Several mining districts in the Weiser drainage, with at least one district known not long after 1890, gained early twentieth century attention. Claims recorded on Monroe Creek (1907-1910) and Hornet Creek (1908-1910) provided mining interest for several years. Other areas around Weiser were somewhat conspicuous as well.
