Forced Ranking Sheet

Instructions: This table will help you to rank your entries as you evaluate each entry. After your first interview, you will rank that student as 1. After your second interview, you will rank the two students you have seen as 1 or 2, and so forth as you interview students. By the end of your flight, you should have every student ranked in order. This table will help you keep track of how the students are doing in relation to each other so that you can easily decide on the winners from your flight.
